TOTALS	20.1	14.6

PERIMETER / AREA MEASURE - Compares the AREA (A) and PERIMETER (P) of a district according to the formula:

$$P^2 / 4\pi A$$

SMALLEST CIRCLE MEASURE - Compares the area of the smallest or minimum circumscribing circle (MCC) and the area of the district according to the formula:

$$\text{Area of MCC} / \text{Area of District}$$

Note that compactness statistics are formulated such that a perfect circle would yield a value of 1.0 in both measures and values would increase from that base. Thus the higher the value, the less compact the district is using the selected compactness measure
