

# Exhibit A

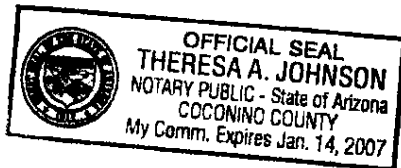

9. Of the 951 Provisional ballots cast, 167 ballots were not counted.
10. Of the 18 voting precincts on the Indian Reservations, a total of 84 Conditional ballots were cast and of those, 69 ballots were not counted. Therefore, 82% of the Conditional ballots were not counted.
11. Of the 67 voting precincts located off Indian Reservations, a total of 48 Conditional ballots were cast, and of those, 29 ballots were not counted. Therefore, 60.4 % of the Conditional ballots from voting precincts located off Indian Reservations were not counted.
12. Of the 18 voting precincts on the Indian Reservations, a total of 304 Provisional ballots were cast and of those, 36 were not counted. Therefore, 11.8% of the Provisional ballots were not counted.
13. Of the 67 voting precincts located off Indian Reservations, a total of 647 Provisional ballots were cast and of those, 131 were not counted. Therefore, 20% of the Provisional ballots were not counted.
14. Following a de-briefing session with the persons employed to work at the polls to check identification, eleven such employees reported that one or more people entered the polling place and left without voting because they could not present the proper forms of identification.
15. My observation of the meaning of "residence" to a Navajo voter is that of their parents' or clan and is in the location of their chapter membership, not their mailing or actual current residence. As a result, the voter registration records of their residence are not the same as the documents they present for identification. Therefore, they are unable to present proper identification and cannot vote.

I declare under penalty of perjury that the foregoing statement is true and correct.
