*The Census Bureau provides estimated citizenship data at the block group level. All block groups with more than 50% of the population in the district are included in the analysis.
 **In most contests, election results do not include results from third party, independent, or write-in candidates. Complete official results are maintained by the office of the secretary of state.
 *** "Statewides" is a weighted average of the results of all general election statewide contested contests.
 **** Compactness measures include "Perimeter to Area," which is the ratio of the area of a circle with the same perimeter as the district to the area of the district, and "Smallest Circle," which is the ratio of the area of the smallest circle enclosing the district to the area of the district.

The Census Bureau provides estimated citizenship data at the block group level. All block groups with more than 50% of the population in the district are included in the analysis.
 * Most contests, election results do not include results from third party, independent, or write-in candidates. Complete official results are maintained by the office of the secretary of state.
 ** "Statewide" is a weighted average of the results of all general election statewide contested contests.
 *** Compactness measures include "Perimeter to Area," which is the ratio of the area of a circle with the same perimeter as the district to the area of the district, and "Smallest Circle," which is the ratio of the area of the smallest circle enclosing the district to the area of the district.

*The Census Bureau provides estimated citizenship data at the block group level. All block groups with more than 50% of the population in the district are included in the analysis.
**In most contests, election results do not include results from third party, independent, or write-in candidates. Complete official results are maintained by the office of the secretary of state.
*** "Statewides" is a weighted average of the results of all general election statewide contested contests.
**** Compactness measures include "Perimeter to Area," which is the ratio of the area of a circle with the same perimeter as the district to the area of the district, and "Smallest Circle," which is the ratio of the area of the smallest circle enclosing the district to the area of the district.
